DESCRIPTION

The EXA PROBE Series of products are an advance Monitoring System for digital Radio, TV and SAT signals. Its architecture includes an internal memory for direct acquisition of all alarms and measurements and the ability to interface Network Management Systems with the most modern protocols.

The EXA Probe 100 is a versatile double RF receiver unit that can be programmed to analyze multiple RF Signals, logging power, digital data, and where applicable, spectrums, constellations and echoes.

This for: DVBT & T2 (DTMB on request), DVB S & S2 & S2X, FM & DAB+ and ASI signals.

Transport Stream (TS) analysis with ETR 101-290, TS storage, display of MPEG program tables is also part of the EXA-PROBE 100 capabilities.

Its internal WEB SERVER will allow a user friendly remote access interface with any WEB BROWSER for measurements, graphs, TS analysis, spectrums analysis, playback of TS video clips and more!

The EXA-PROBE-100, supplied with N. 2 Hot Swap Redundant PSU, can be equipped with up to 2 RF Receiver Modules.

HOW TO FIND US

Situated in one of the most beautiful tourist locations in Italy, on Lake Garda, ROVER can be easily reached from Milan, Bergamo, Verona and Venice airports.

Lake Garda is in the north of Italy, near the borders of Austria, Switzerland and Germany and is in the foothills of the Alps. Lake Garda has a micro-climate, tropical in summer and temperate in winter, and where palms, olives, lemons, oranges, bouganville and even banana trees can grow.

Exploited by the Romans as long ago as 350 a.C., it is now one of the most important lakeside, spa and tourist resorts in Europe. Please find below photographs of some of the most important tourist attractions in the area.
